

# TEDDINGTON STARLIGHT STOMP

## WHERE YOUR MONEY GOES...

This year funds from our Starlight Stomp are going toward the **Teddington Trust – Little Ted Book & Bear Project**.

### Our Aim

*To provide free of charge educational resources to all children with Xeroderma Pigmentosum in the UK and Europe, and beyond as funds allow!*

### **Little Ted Books**

Providing free educational children's stories and resources to children with Xeroderma Pigmentosum (XP). These stories have been developed to help them understand and come to terms with their limiting condition which means living a life protected from DAYLIGHT and all artificial ultra-violet (UV) light sources!

These stories have been written by Eddison's Mum and beautifully illustrated by local illustrator Michael Howdon. They comprise 6 health and lifestyle related titles specific to XP, ranging from understanding the differences between day and night and safety implications, starting at nursery/school and coping with hospital visits and treatment.

**Just £10.00 allows 1 complete book set to be sent to a child!**

### **Little Ted Bear**

This bear has been developed to reflect the book character of Little Ted and is so much more than just a soft child's toy! He comes complete with full UV protective clothing and UV reactive feature allowing children and their parents to use him as an educational resource alongside the suite of books.

So as well as having something the children can identify with as being 'like me', they will also learn in a fun way about the importance of their own photo-protection and how to achieve it.

**£75.00 allows us to send a child their own Little Ted!**
